**DETAILED ACTION*****Response to Arguments***

1. Applicant's arguments, see pages 5-7, filed on April 19, 2007, with respect to the rejections of claims 1, 2, and 5-14 have been fully considered and are persuasive. The rejections have been withdrawn. Applicant's argues that prior art does not teach that the electric field is generated in the optical waveguide by nonlinear optical effect when the optical signal propagates through the optical waveguide, where in the optical signal is incident on a side surface of the dielectric substrate parallel to the longitudinal direction of the pair of electrodes, and wherein when the optical signal is incident on the side surface of the dielectric substrate, a variation in the electric field generated in the optical waveguide is output as an electrical signal from the pair of electrodes.

***Allowable Subject Matter***

2. Claims 1, 2, and 5-14 are allowed. The following is an examiner's statement of reasons for allowance. Claim 1 is allowed because the prior art of record fails to teach or fairly suggest an apparatus, or means for, an optical signal to electrical signal converter comprising; an optical waveguide for receiving and propagating an optical signal that has been modulated so as to have a side band represented by [the equations in the claim]; said electric field being generated in the optical waveguide by nonlinear optical effect when the optical signal propagates through the optical waveguide, where in the optical signal is incident on a side surface of the dielectric substrate parallel to the longitudinal direction of the pair of electrodes, and wherein when the

optical signal is incident on the side surface of the dielectric substrate, a variation in the electric field generated in the optical waveguide is output as an electrical signal from the pair of electrodes; in combination with the other recited limitations in the claim. Claims 2 and 5-14 are allowed by virtue of their dependence on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
